

Safety@Work is looking to recruit up to 100 ambitious, enthusiastic and passionate people who really care about worker safety.

Our client Shell is constructing 2 huge process plants on Jurong Island and Pulau Ular. In addition they will be carrying out significant modifications to its refinery on Pulau Bukom. Employing in excess of 10,000 people from all over Asia, the health and safety of these contract workers is of the utmost importance.

The successful candidates will be employed by **Safety@Work** on one of the 3 sub-projects for a period of 16 months and assigned to a major international Engineering Construction Contractor. During this time they will receive on the job training in a world-class safety culture with experienced international professionals. In addition, there will be formal, recognized diploma courses available to those candidates who want to progress into Singapore's busy industrial sectors when the Shell projects are completed.

The ideal candidate will need to be strong on communication skills, be able to work in a heavy, outdoor construction environment and possess at least A Levels or a Diploma education.

A competitive salary will be offered with an additional monthly disbursement payable at the end of the agreed contract period.

Please register your interest by completing the on-line application form and submitting your CV to hr@safetyatwork.com.sg. Alternatively, contact **Safety@Work** on +65 264 1500 for further details.
